

Name - Vasu Kalamija

Roll - PE29

Sub - WAC

Assignment - 1

Q 1 There are many personal value and ethical qualities to practices in everyday life such as kindness, honesty, integrity, empathy forgiveness. Think on any one value and explain meaning and importance of that value and write any nice story based on that value. and explain Try to inculcate the chosen value by you

The quality which I would like to include in me is smartwork. There is one nice story of Rocks, Pebbles & sand based on this. Once a professor entered the classroom with a glass jar, rocks, pebbles & sand the students were amused to see what he was up to, First he started filling the rock parts into the jar untill he couldn't add any more. He asked the students if the jar was full & everybody nodded yes. He then started putting the pebbles inside through the small gaps & he shakes the jar to allow the pebbles to get into those vacant spaces in between the rocks. He asked the same question to the students & they again said that the jar was full. Finally, he ~~proved~~ poured the sand inside the jar which ~~was~~ went through the minute gaps & ~~jar~~ got filled in the jar. The professor explained that this is how you should set priorities in life.

Rock is like your family while pebbles are like your ~~career~~ ^{career} while sand is like ~~y~~ the ~~last~~ least priorities in life and unnecessary quarrels and egos. If you put sand on the jar first, it will get easily filled up leaving no spaces for rocks & pebbles.

Moral: You should identify your priorities so in life & develop a good strategy to do the work smartly to work towards fulfilling it rather than wasting your time & effort on unnecessary aspects of life. My action plan will be to do the work with higher priority first then other work it will help me to use time efficiently.

Q 2 As material prosperity increases the moral value of person changes. Do you agree with this? Justify with one or two examples. Which values may change comment on this.

I donot agree with the statement mentioned above. My opinion is that when material prosperity increases, the moral value of person may change or not, because it depends on that perticular individual. For example, we have Ratan Tata who is at #one of the highest position in business which one can dream off. when his hotel Taj was targetted by terrorists, at that time, he pro personally visited the place and help all the people who were injured and the ones who were sitting outside the hotel monetarily for the entire life time as well as educational help for their children when material prosperity increases ~~genor~~ generosity of person may increase as his/her has stabilized how they can help other people to grow, this is a quality to a good human to help the other.
